Plant and Soil **175**: 335–337, 1995.

Contents Volume 175 (1995)

Research articles

Uptake of saline groundwater by plants: An analytical model for semi-arid and arid areas 1–11
P.J. Thorburn, G.R. Walker and I.D. Jolly

Evidence against associative N_2 fixation as a significant N source in long-term wheat plots 13–19
E. Bremer, H.H. Janzen and C. Gilbertson

Changes in the origin and quality of soil organic matter after pasture introduction in Rondônia (Brazil) 21–29
B.J. Feigl, J. Melillo and C.C. Cerri

Stem deformity in *Pinus radiata* plantations in south-eastern Australia. II. Effects of availability of soil nitrogen and response to fertiliser and lime 31–44
P. Hopmans, M. Kitching and G. Croatto

Nitrogen fixation by groundnut and soyabean and residual nitrogen benefits to rice in farmers' fields in Northeast Thailand 45–56
B. Toomsan, J.F. McDonagh, V. Limpinuntana and K.E. giller

Estimates of seasonal nitrogen fixation of annual subterranean clover-based pastures using the ^{15}N natural abundance technique 57–66
T.P. Bolger, J.S. Pate, M.J. Unkovich and N.C. Turner

Cadmium status of soils and plants from a long-term fertility experiment in southeast Norway 67–74
A.S. Jeng and B.R. Singh

Net uptake of sulphate and its transport to the shoot in tobacco plants fumigated with H_2S or SO_2 75–84
C. Herschbach, L.J. de Kok and H. Rennenberg

A comparative account of the microbiological characteristics of soils under natural forest, grassland and cropfield from Eastern India 85–91
P. Prasad, S. Basu and N. Behera

Heavy-metal uptake by crops from polluted river sediments covered by non-polluted topsoil. I. Effects of topsoil depth on metal contents 93–104
W. van Driel, B. van Luit, K.W. Smilde and W. Schuurmans

Heavy-metal uptake by crops from polluted river sediments covered by non-polluted topsoil. II. Cd-uptake by maize in relation to root development 105–113
M. van Noordwijk, W. van Driel, G. Brouwer and W. Schuurmans

Estimation of the influx and the radius of the depletion zone developing around a root during nutrient uptake 115–123
K.M. Syring and N. Claassen

Growth, radicle and root hair development of *Deschampsia flexuosa* (L.) Trin. seedlings in relation to soil acidity 125–132
A.-M. Balsberg-Påhlsson

Root surface area measurements based on adsorption and desorption of nitrite 133–137
S.A. Ansari, P. Kumar and B.N. Gupta

A comparison of rooting environments in containers of different sizes 139–146
J. Townend and A.L. Dickinson

The use of fluorogenic substrates for measuring enzyme activity in peatlands 147–152
C. Freeman, G. Liska, N.J. Ostle, S.E. Jones and M.A. Lock

Short communication

Seasonal changes in production and nutrient content of *Cynodon dactylon* (L.) Pers. subjected to water deficits 153–157
M.J. Utrillas, L. Alegre and E. Simon

Research articles

Effect of the non-fertilizer N supply of grassland soils on the response of herbage to N fertilization under mowing conditions 159–166
J. Hassink

Microbial biomass C and N, and mineralizable-N, in litter and mineral soil under *Pinus radiata* on a coastal sand: influence of stand age and harvest management 167–177
D.J. Ross, G.P. Sparling, C.M. Burke, C.T. Smith

Fate and effects on yield components of extra applications of nitrogen on spring wheat (*Triticum aestivum* L.) grown in solution culture 179–188
P. Oscarson, T. Lundborg, M. Larsson, C.-M. Larsson

Nitrogen fixation response of stem- and root-nodulating *Sesbania* species to flooding and mineral nitrogen 189–196
M. Becker, T. George

Repeated wet-dry cycles do not accelerate the mineralization of organic C involved in the macro-aggregation of a sandy loam soil 197–203
B.P. Degens, G.P. Sparling

Nitrogen transformations in two nitrogen saturated forest ecosystems subjected to an experimental decrease in nitrogen deposition 205–218
C.J. Koopmans, W.C. Lubrecht, A. Tietema

Evaluation of early generations for iron chlorosis in relation to productivity in groundnut (*Arachis hypogaea* L.) 219–223
V.N. Kulkarni, M.V.C. Gowda, A.F. Habib

Transfer factors for Sr as influenced by species Ca uptake and soil Ca availability 225–232
D.S. Veresoglou, N. Barbayiannis, G.C. Zalidis, S. Kalpakis, E. Batianis

Root colonization of maize by a Cd-sensitive and a Cd-tolerant *Glomus mosseae* and cadmium uptake in sand culture 233–238
I. Weissenhorn, C. Leyval

Phosphorus and nitrogen fertilization of a Norway spruce forest – effects on needle concentrations and acid phosphatase activity in the humus layer 239–249
M. Clarholm, U. Rosengren-Brinck

The K/Na and Ca/Na ratios and rapeseed yield, under soil salinity or sodicity 251–255
C.A. Porcelli, F.H. Gutierrez Boem, R.S. Lavado

The role of endophytic bacteria during seed piece decay and potato tuberization 257–263
A.V. Sturz

Effect of legume-based cropping systems on nitrogen mineralization potential of Vertisol 265–274
S.P. Wani, T.J. Rego, S. Rajeswari, K.K. Lee

Differential chemical allocation and plant adaptation: A Py-MS Study of 24 species differing in relative growth rate 275–289
G.J. Niemann, J.B.M. Pureveen, G.B. Eijkel, H. Poorter, J.J. Boon

Evaluation of selected geocarposphere bacteria for biological control of *Aspergillus flavus* in peanut 291–299
C.J. Mickler, K.L. Bowen, J.W. Kloepper

Exploration and exploitation of soil by apple, kiwifruit, peach, Asian pear and grape roots 301–309
K.A. Hughes, P.W. Gandar, H.N. de Silva

Variation in response of accessions of minor millets, *Pennisetum americanum* (L.) Leeke (pearl millet) and *Eleusine coracana* (L.) Gaertn (finger millet), and *Eragrostis tef* (Zucc.) Trotter (tef) to salinity in early seedling growth 311–321
F. Kebebew, T. McNeilly

Effects of antibiotics in soil on the population dynamics of transposon Tn*5* carrying *Pseudomonas fluorescens* 323–333
R. da Gloria Britto de Oliveira, A.C. Wolters, J.D. van Elsas

Contents Volume 175 (1995) 335–337
